

## Experiment 5a

### Objectives

- To learn ListBox
- To learn CheckBox
- To learn Label
- To learn TextBox
- To learn Button

### Lab Exercises

#### Lab Exercise 1 –ListBox Configuration

Create a "shoe ordering system". The user will be able to create an order via this screen. User enters name-surname and phone information into TextBox fields. Selects a model from the shoe brand models listed in the ListBox. Selects the number information via CheckBox. Then he/she selects the province and the district affiliated with the chosen one. When you click on the "Create Order" button, the order created on the ListBox is displayed.

#### Checkpoints;

- 1) Define Textbox for username, surname and phone number.
- 2) Define ListBox for brand and model.
- 3) Define CheckBox for number selection.
- 4) Define ListBoxes for city and district selection (Eskişehir and Ankara only).
- 5) Define button to create order.
- 6) Define ListBox to list the created order.
- 7) Displaying order date in ListBox.

- Sample image is on page 2.
- In this lab, design will be included in the grading, make a simple and elegant design. You can take well-known mobile applications as an example.
